

Available only through
licensed producers

TifTuf Bermudagrass Characteristics

- Exceptional shade and drought tolerance.
- Fine-leaf texture.
- High turf density.
- Aggressive growth.
- Superior fall color.

Improved Plant Vigor

- Retains more moisture.
- Has a 90% survivability rate in temperatures as low as -6F.
- Retains 95% more green leaf tissue in drought stress compared to Tifway.
- After 19 drought stress trials, TifTuf was designated as the research standard by which all drought tolerance will be determined.

Cultural Practices

- Mow at 0.5-2 inches of height.
- Can be mowed with reel or rotary mower.
- Requires little irrigation once roots have been established.
- Apply weed control or weed-and-feed combination that are specifically labelled for Bermuda grass.
- Pre-emergent herbicide application is recommended in the spring and fall.

Certified Purity & Uniformity

- TifTuf is licensed exclusively to The Turfgrass Group, Inc. and its sub-licensees.
- TifTuf is available only through a select group of licensed certified producers.
- TifTuf is grown and sold under a rigorous set of rules and guidelines designed to promote on-going quality, purity, and uniformity.

State Certification

- Certification is the only method of assuring the consumer is receiving the variety they purchased.
- TifTuf can only be produced and sold as a Certified turfgrass variety, unlike many other varieties.
- Certification agencies in each state inspect all TifTuf production fields regularly, protecting the interests of the consumer by providing a third-party system of quality control.
